PROCESS FOR USER REGISTRATION:

In order to access the full functionality of the BBN, the person/entity seeking such access must register as a User through any means offered on the BBN. As part of the registration process to become a user, you are required to (i) be a partner of the IDS for the BBN program, (ii) identify a person who will act as a single point of contact ("**SPOC**") in your organization to be responsible for the administration of the node, who can be reachable for any technical issue that may arise, (iii) identify a contact person for communications of general purpose between the IDS and the User, (iv) indicate if any entity other than the User will have access to the User's validator node. If your registration is accepted, you will be assigned a User identification code ("**User Identification**"). The User will have access to various Content and system resources associated with your User Identification as determined by IDS in its sole discretion, which may include designated directories, designated contact person, web pages, e-mail or other capabilities, information storage, and/or types of transactional data to be sent to the network, and which may be changed, terminated, increased or decreased by IDS, at its sole discretion, from time to time. The use of pseudonyms, aliases or other devices to conceal your identity is strictly forbidden and grounds for the immediate termination of the authorization of your User Identification.
